GREGOR VOINOV
UX/SENIOR UI DESIGNER
UI CODER

This is me

Hello

I'm Gregor Voinov, a **UX/ Senior UI Designer** and **UI Coder** based in Vienna. With over **20 years of experience**, I've specialized in creating user-centric solutions across diverse industries, including **e-commerce**, retail, finance and **luxury**.

From 2020 to 2023, I also had the opportunity to **lead a team** of two junior designers, guiding them in their professional growth.

Beyond the screen, my wife and our energetic 3-year-old are the centre of my life. I have a fiery passion for super hot food and cooking. To recharge, I love long walks and hikes in nature. In the evening, I love chilling on the couch but also feeling the energy of standing in the first line at punk concerts. On vacation, I love to scuba dive and explore the world from a new perspective.

Job Roles

While **UI design** is my primary focus, I also bring a strong foundation in **UX** and **frontend development**.

I stay involved from the initial UX phase through to development.

This continuous involvement leads to key benefits:

- **Better alignment between design and development**
Ensuring the final product matches the design quality.
- **Improved collaboration and communication**
Faster iterations and feedback loops
- **Improved user experience**
Through a holistic approach

01

UX

I took part in UX workshops with clients and participated in **ideation** and **definition phases**. This early involvement helped me to understand **user needs** and align them with **business goals** to develop practical solutions.

I translated these insights into **wireframes** and **user flows**, tested them with users and **refined** the screens based on their feedback.

02 UI

With a strong foundation in **UI design** and **design system development**, I help clients bring their digital presence to life. My focus is on creating **clear** and **consistent** interfaces that are not only visually appealing but also **highly functional**. I make sure that every interaction bridges form and function and provides an effortless user experience, that's **aligned** with the **brand's identity**.

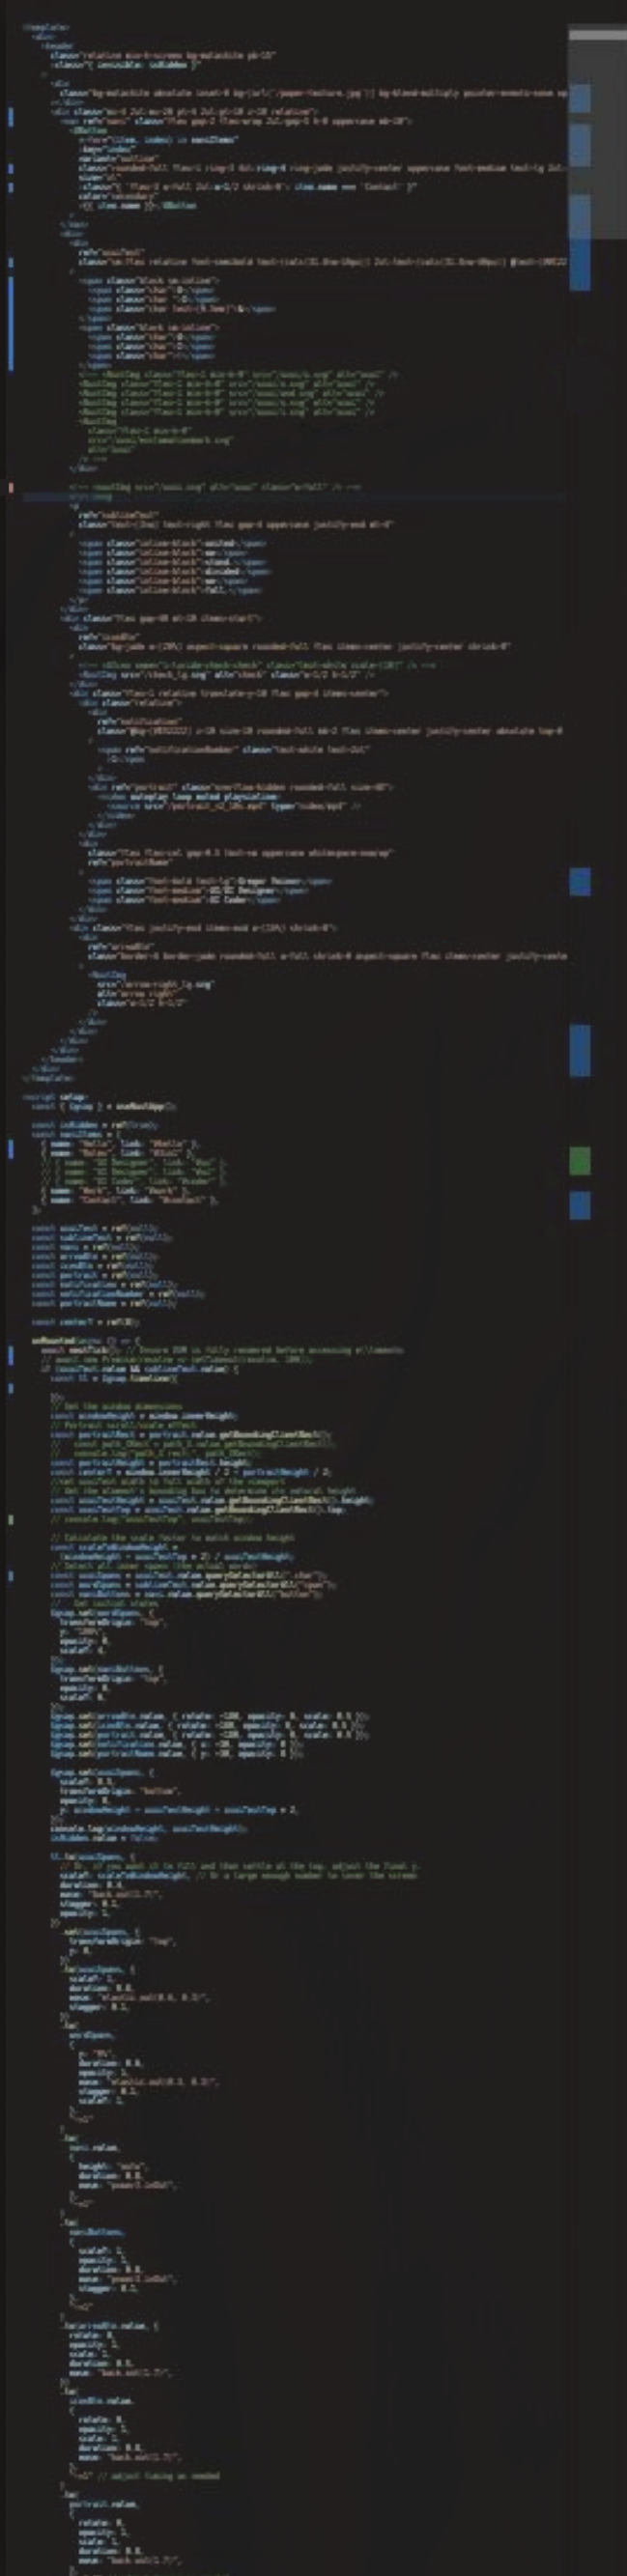

```
10 let thread = threadId
12 ? { id: threadId }
13 : await openai.beta.threads.create();
14
15 // Add user message to the thread
16 await openai.beta.threads.messages
17   role: "user",
18   content: message,
19 });
20
21 // Start assistant response
22 const run = await openai.beta.threads
23   assistant_id: assistantId,
24 });
25
26 // Poll for completion
27 while (true) {
28   const runStatus = await openai.beta
29     thread.id,
30     run.id
31   };
32   if (runStatus.status === "complete"
33     if (["failed", "cancelled"].includes(
34       return { error: "Assistant failed to
35     await new Promise((resolve) => se
36   )
37
38 // Fetch assistant's response
39 const messages = await openai.beta.threads.messages.list(thread.id);
```

03 DEV

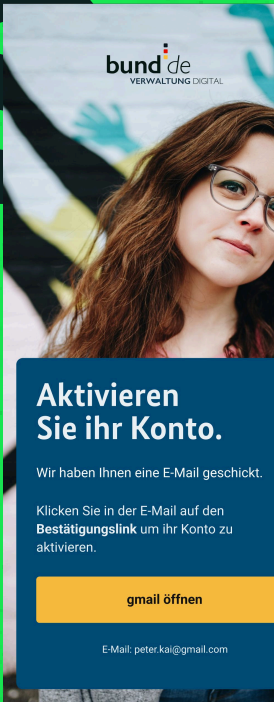

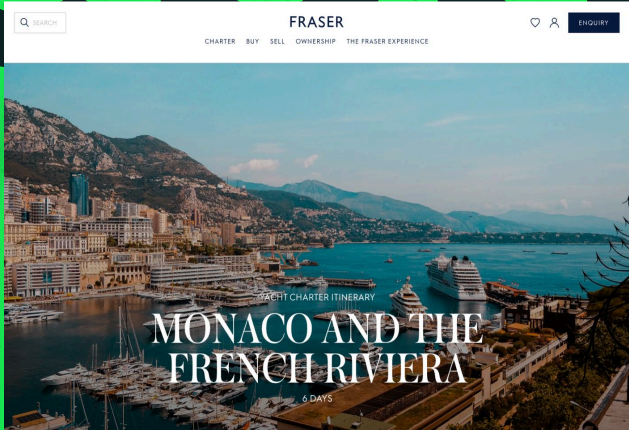

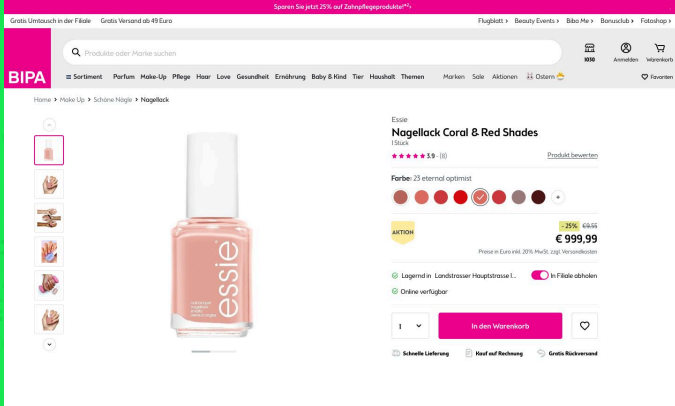

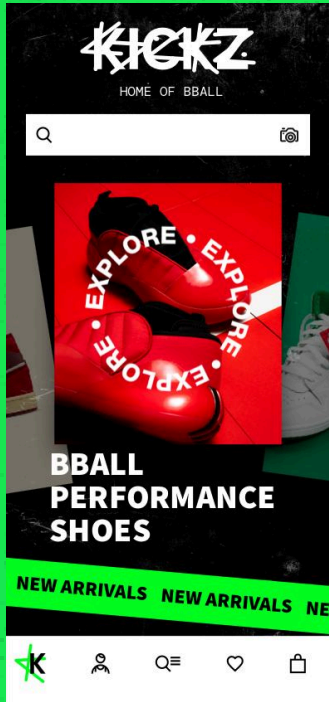

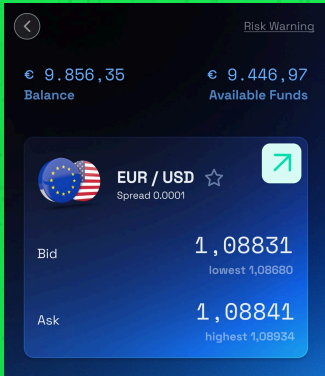

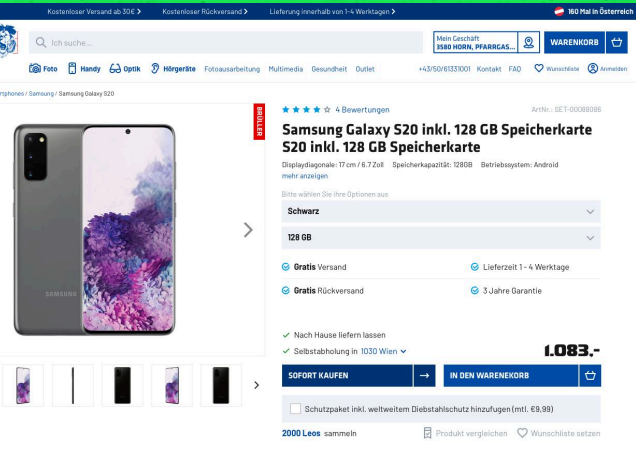

I'm a designer who codes, using **Nuxt.js**, **gsap** and **Tailwind CSS** to create high-fidelity prototypes that are perfect for **proof of concept**, convince stakeholders, and speed up development. My capabilities extend beyond traditional design, positioning me as a proficient **UI-Coder**.

While Nuxt.js is my current focus, I'm ready to learn any JavaScript framework required for the job.

Who can say it better than my colleagues

A great self starter with a clear design vision who with the smallest and vaguest of prompts and insights as to our final goal was able to articulate our end goal in the greatest clarity, which then enabled the wider team to mobilise and develop the building blocks eventually delivering a UI and App founded entirely on Gregors vision and expertise.

He delivered in time what the client required and was always able to give arguments why he managed the solution the way he presented.

It was a pleasure working with Gregor, he delivered in time, mentioned impediments early and in general was fun to work with. I enjoyed our project very much and hope to work with him soon again, maybe as a member of one of my project teams.

He had to work together with different team members both on Epam side and on customer side and in a very short term he was able create great relationship with them.

Gregor, thank you for your exceptional support for the RFP opportunity. Your dedication and quality of work are highly appreciated. Thanks for helping to prove to our clients that we deliver excellence on all fronts.

Gregor is doing high-quality work, he is full of new ideas and ahead of his time. You can always count on him!

My carrer stops

Ideally, I'm looking for a role that's around 30-33 hours per week. Should a critical situation require it, I am willing to temporarily increase my hours to meet deadlines.

After two years, when my little girl turns 5, I would like to return to 38.5 hours per week.
